 presentation
 2016 - Northwest Chapter of APT workshop - student
 research presentation

Awards:

11/2016 APT Student Scholar

Membership in Professional Organizations:

APTI

Experience with WCAPT and other Preservation Organizations:

I had brief involvement with the Northwest Chapter of APTI during my final year at the University of Oregon where I gave a brief talk on my student research on glue-laminated buildings. I also participated in APT as a 2016 Student Scholar and presented my student research at the 2016 APT conference with a few other presenters. My experience with WCAPT and other preservation organizations has been limited so far, but I look forward for the opportunity for more involvement in the coming future.

Other Information:

Vision Statement for WCAPT:

Since joining the San Francisco branch of Wiss, Janney, Elstner Associates in 2016, I have had the opportunity to work on a number of diverse and challenging projects involving rehabilitation and historic evaluation of historic properties, building on my previous experience working with historic properties on behalf of the University of Oregon. I am interested in continuing my prior involvement with APT by joining the Western Chapter's Board of Directors so that I can apply my expanding experience to APT to promote and foster the technological facets of preservation that are so critical to our historic resources. I am particularly interested in fostering preservation technology for the vernacular resources and Modern heritage of the western United States, as these often present unique and complex challenges which require sensitive approaches and technological expertise.
